Romance of UFO

UFO means “unidentified flying object.” So I think UFOs mustn’t be identified. You may think I said a joke, but an UFO is that sort of object. First, I don’t believe UFO. If they are really spaceships of aliens, I will have a lot of questions. Why do they come to earth? How do they come to earth? Where do they live? Why can’t we discover them? Why don’t they contact with us? The existence of UFOs is unscientific and illogical. But, I can’t say UFOs are nonsense. Because, UFOs give us a dream, a hope, and a romance! I like novels, stories, and fictions, and especially Fantasy or SF. UFOs are similar to ghosts, fairies, angels or devils. They have a common feature: They have neither a proof of existence nor a proof of absence. These imaginary things are necessary for people. Because, they make people imagine. Good imagination produces good art.

Nowadays, this world is too real for me. Wonders in the world are answered, forest in which people once looked fairies are deforested, department stores are built next to old cemeteries. People can walk on moon, rockets can go to Mars. Evolution is a good thing, but I think it is boring that space to imagine disappeared.
